

EDUCATIONAL SERVICES

The village is a location rich in experience and its educational proposals are thought to instill classes and organized groups the perception of the peculiarity of the site. In addition to the traditional guided tours, it is possible to at-

tend the complete activation of the smithy or experiment the precious arts of engraving and print, thanks to the presence of a **lithographic printing press dating back to the late 19th century** and originally owned by Francesco Medici.

At the beginning of every school year, the Museum hosts various educational propositions for schools and organized groups, accompanied by activities divided in three itineraries embracing the whole territory: **The Iron and Mining route, Worship places and The Woods** narrate.
